

The Siger S60 Series Dental System

Unparalleled Quality : Affordability

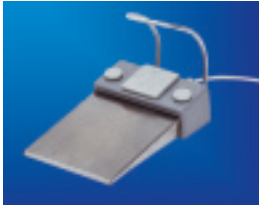

The ergonomic properties of the Siger dental chair provide wide flexibility for patient placement with the comfort of correct posture being maintained in all positions.

The assistant control panel can be adjusted to any position including height, to suit the assistant's working style.

With an integrated control panel for operation of all major unit functions.

Large working tray area, coupled with the comprehensive control panel provides a working environment for the dental team with all instruments and controls easy to hand.

The spittoon cup filler can also supply heated rinsing water for patient comfort.

All Siger dental systems include the shadow-free operating light, controlled from the console panels.

Siger systems incorporate a large water bottle for instrument water with selection switch between bottle and - mains water supply.

Choice of hanging tube or continental delivery style
